序境 / LUMENIS

ROUND 01 双源审计
与 15 轮多终端闭环提案

REMOTE · LOCAL · EXECUTABLE SOURCE · FULL 235-PAGE TASKBOOK

READ-ONLY AUDIT COMPLETE

MULTI-SURFACE: RECOMMENDED / NOT APPROVED

ORIGINAL PDF: PRESERVED / NOT OVERWRITTEN

origin/main c3036aa714ff3236e1267d33cbfb9d2aa33ed000

local HEAD c3036aa714ff3236e1267d33cbfb9d2aa33ed000

audit date 2026-09-21

EXECUTIVE

Decision status

独立 ROUND 01 提案，不覆盖原任务书。235 页完整读取，225 Task 完整映射，多终端路线仍需 Product Owner 批准。

批准前禁止创建第二套 Web、恢复 templates/static/experience_v2、修改 sole architecture authority，或把 RECOMMENDED 写成 APPROVED。

Area	Status	Evidence
Remote truth	VERIFIED	main @ c3036aa; only remote main
Local truth	VERIFIED	HEAD equal; 17 unstaged; 10 real diffs protected
PDF coverage	VERIFIED	235 pages; 225 tasks; 54 SOL; 171 LUNA
Runtime	LIVE_UNVERIFIED	8200, 8201 and 9222-9224 not listening
Release	BLOCKED	strict gate fail; no current CI run; no live E2E
Multi-surface	NOT APPROVED	R02 Product Owner gate first

ROUND 01

ROUND 01 Charter

- CURRENT REMOTE SHA: c3036aa714ff3236e1267d33cbfb9d2aa33ed000
- CURRENT LOCAL SHA: c3036aa714ff3236e1267d33cbfb9d2aa33ed000
- LOCAL STATUS: main; ahead/behind 0/0; 17 unstaged; 10 real diffs; no staged or untracked before this PDF.
- OUTCOME: remote, local, source and PDF truth; 15-round map; multi-surface decision input; source remains read-only.
- PDF TASKS: EXEC p1-10 plus p11-14 SOL-000, SOL-001, SOL-002, LUNA-003.
- OWNERS: Sol / Product Architecture; domain owners are audit subjects.
- ALLOWED: read-only Git, GitHub, source and PDF; independent output PDF.
- FORBIDDEN: source, governance, contract, migration, test or runtime writes; old Web restore; original PDF overwrite.
- LUNA BATCHES: none in ROUND 01.
- VALIDATION: SHA, status, diff, GitHub runs, authority gates, 235-page extraction, registries, ports, routes and Web scan.
- EXIT: A-O; 235-page map; exactly 15 rounds; Round 02 hold point.
- STOP: any unverified source or protected local overlap.

A

REMOTE TRUTH

- origin: https://github.com/Zachary-1012/LUMENIS-codex-Clean-OS.git
- default and only remote branch: main; origin/main = c3036aa714ff3236e1267d33cbfb9d2aa33ed000
- tracked files 2106; Python about 1010; Dart 44; root Python 191.
- major dirs: intelligence_library 366, tests 348, lumenis 241, app 168, contracts 166, docs 145, scripts 72.
- workflows: App Gate, Product Gate, provider policy, Dependency Graph.
- current SHA has zero check-runs and zero statuses; this is not PASS.
- latest App and Product runs are old-SHA zero-step failures; current SHA did not run.
- workflow triggers do not make main push equivalent to current validation.
- recent commits: c3036aa, 1b78783, b2f9911, b460833, 76fbe1a, 48c4d70, 33a6c0a.

B

LOCAL TRUTH

- HEAD main equals origin/main; ahead 0, behind 0, not diverged.
- 17 unstaged entries: 10 real diffs plus 7 byte-identical generated plugin files.
- real diff: 419 insertions, 854 deletions; no staged or user-untracked files before this report.
- local behavior removes the global product account wall, adds loopback Basic bootstrap, and preserves CTH-02 permission denial.
- strict Experience gate fails: LaunchSurface lost ProductDomain.values and subjects bindings.
- no Git lock, rebase, merge, cherry-pick or bisect; one worktree; no side branch.
- no LUMENIS process; 8200, 8201 and 9222-9224 are not listening; health refused.
- Flutter command and common candidate paths were not resolved: NOT VERIFIED.
- disposition: real diffs PROTECT and REVIEW; generated statuses REVIEW; never auto-clean.

C

REMOTE vs LOCAL DIFFERENCE MATRIX

Dimension	REMOTE	LOCAL	Decision
Commit	origin/main c3036aa	HEAD c3036aa	equal
Branch	main only	main; no side worktree	equal
Worktree	clean snapshot	17 unstaged; 10 real	LOCAL_ONLY
App auth	product account wall	no global wall; Basic bootstrap	unaccepted
Gates	no current check	4 of 5 local; strict FAIL	BLOCKED
Runtime	no live evidence	ports down	LIVE_UNVERIFIED
PDF architecture	App-first	multi-surface requested	pending delta

D

CURRENT SOURCE OWNER MATRIX

Domain	Canonical owner	Implementation and callers	Evidence and gap	Status
Repository and governance	Product Architecture	single repo and main; authorities read	4 of 5 gates; strict Experience fails	VERIFIED
Database and migrations	Shared Database	canonical paths and repository; direct sqlite remains	migration and production data parity pending	PARTIAL
Canonical Data	Product Core	CTH, BMP and Shared models exist	quality and multi-entry semantics not live	PARTIAL
Evidence	shared/evidence	modules and tests exist	actor, domain and object lineage pending	PARTIAL
Permission and effect fence	system/security	protected routes exist	screen read, write and approve incomplete	PARTIAL
Identity, Subject, BrandFocus	Account, CTH, BMP	dual auth and context contracts	no-wall is local; scope pending	LOCAL_ONLY
Runtime and recovery	Runtime	8201 and browser startup logic	nothing live	LIVE_UNVERIFIED
Collector and queue	system/collector	implementation and many tests	scheduler, DLQ and live acquisition pending	PARTIAL
Browser, CDP and Cookie	system/browser	canonical owner exists	no CDP live; Desktop-only boundary	LIVE_UNVERIFIED
AI Gateway and Ollama	system/ai_gateway	providers and tests	no live provider evidence	LIVE_UNVERIFIED
Agent Runtime	shared/agents	registry, runtime and tests	artifact to Evidence live pending	PARTIAL
Reporting and export	shared/reporting	implementation and tests	Permission, lineage and download pending	PARTIAL
Evaluation and learning	shared evaluation and learning	implementation and tests	Outcome to Learning live pending	PARTIAL
CTH workflows	CTH	CTH01 and CTH02 UI; backend partial	remaining UI absent; acceptance pending	PARTIAL

D

CURRENT SOURCE OWNER MATRIX

Domain	Canonical owner	Implementation and callers	Evidence and gap	Status
BMP workflows	BMP	BMP01 UI; mixed backend	remaining UI absent	PARTIAL
Shared workflows	Shared	SH01 UI; partial backend	must not own CTH or BMP truth	PARTIAL
SYSTEM workflows	SYSTEM	SYS01 UI; many routes	remaining UI absent; SYS05 local	PARTIAL
Flutter App	Experience	29 lib; 15 tests; six screens	10 local diffs; no current Flutter run	LOCAL_ONLY
44 Screen specs	Experience	132 contracts; six prose specs	six UI implemented; 38 absent; 44 blocked	PARTIAL
UI, UX, responsive, a11y	Experience	constitution and some widget tests	no current visual, keyboard or reader evidence	PARTIAL
API duplication	API owners	about 562 decorators in 55 files	registration-aware audit needed	PARTIAL
Root compatibility	Owner Index	191 root Python plus scripts and tests	per-caller parity incomplete	PARTIAL
Tests, CI, quarantine	CI tiers	Tier A, B, C; env 24; quarantine 1	no current run; local strict fail	BLOCKED
Packaging, beta, release	Release	platform directories exist	clean clone and five-platform proof absent	BLOCKED
Historical assets	Governance	410 old Web files removed at 3ba304f5	do not restore; recover capability by proof	EXISTS_BUT_UNSCOPED

E

PDF COVERAGE REPORT

- 235 of 235 pages extracted; no empty page.
- 10 execution protocol pages.
- 225 tasks SOL or LUNA-000 through 224; no missing or duplicate IDs.
- 54 SOL and 171 LUNA tasks.
- 44 screens, four tasks each, 176 screen tasks.
- 44 UI sketch pages rendered and visually inspected.
- all 225 tasks contain goal, inputs, allowed, forbidden, completion and validation fields.
- 224 dependency fields; SOL-000 has none.
- Backend, DB, Evidence, Permission, Runtime, Collector, AI, Agent, E2E and release tasks are retained.
- original PDF is App-first; multi-surface is a pending delta, not source fact.
- full row-by-row map is in Appendix 1.

F

15 ROUND MASTER TABLE

Round	Name	Task IDs	Owner	Primary outcome	Exit gate
01	Current truth and dual source	000-003 plus EXEC	Sol	read-only audit and map	A-O complete
02	Authority, Only-One, Multi-Surface	004,005,019	Architecture	decision, caller map, compatibility gate	PO approval
03	Database and Canonical Truth	006	Database	path, repository, migration, callers	one DB truth
04	Identity, Context, Permission, Evidence	007-010	Security and Evidence	actor, Subject, BrandFocus, fence	trace and deny states
05	Runtime, Health, Recovery	016-018	Runtime	startup, health, guardian, CI preflight	honest live health
06	Collector, Browser, Acquisition	014-015	Collector and Browser	scheduler, CDP, session, ingestion	Evidence ingestion
07	AI, Agent, Reporting, Learning	011-013	AI and Agents	gateway, task, artifact, evaluation	AI stays derivative
08	Cross-Surface Experience Foundation	020-023 plus delta	Experience	Public, Web, Desktop, Mobile shells	surface boundary
09	Golden Pages and CTH-02	024; 041-048; 081-084; 125-128; 145-148; 177-180	Cross-domain	six implemented workflows	runtime acceptance
10	CTH Monitoring and Analysis	049-068	CTH	CTH03-07	source-backed flow
11	CTH Case, Risk, Decision, Report	069-080	CTH and Shared	CTH08-10	decision lineage
12	BMP Portfolio, Market, Creator	085-100	BMP	BMP02-05	BrandFocus flow
13	BMP Content, Campaign, Risk, Benchmark	101-124	BMP and Shared	BMP06-11	Evaluation and Learning
14	ACC, AI, Shared, SYSTEM Remaining	025-040;129-144;149-176;181-200	Cross-owner	owner-serial batches	usable or honest blocked

F

15 ROUND MASTER TABLE

Round	Name	Task IDs	Owner	Primary outcome	Exit gate
15	Cross-Surface Beta and Release	201-224	Release	clean clone, beta, rollback	release evidence

G

DEFERRED / BLOCKED / UNKNOWN

- BLOCKED: local strict Experience gate fails; four of five is not PASS.
- BLOCKED: no current-SHA App Gate or Product Gate run.
- LIVE_UNVERIFIED: Core, Web and CDP are down; route registration is not health.
- LOCAL_ONLY: protected App auth changes have not passed current Flutter or runtime acceptance.
- UNKNOWN: all 54 bindings remain acceptance PENDING for scope, Permission and Evidence.
- BLOCKED: six UI screens implemented, 38 absent, all 44 acceptance blocked.
- DEFERRED: internal beta product account wall remains deferred; technical auth and screen Permission remain mandatory.
- NOT APPROVED: Public Website, Web Workspace, Flutter Web and authority changes.
- BLOCKED: clean clone, platform targets, beta, rollback and release evidence absent.

H

ROUND 02 FIRST TASK CARD

- TASK ID: SOL-R02-MSA-DECISION, then LUNA-R02-B001.
- ROLE: Sol architecture decision; Luna only after Product Owner approval.
- BASE REMOTE SHA: c3036aa714ff3236e1267d33cbfb9d2aa33ed000
- BASE LOCAL SHA: c3036aa714ff3236e1267d33cbfb9d2aa33ed000
- GOAL: approve or reject one Multi-Surface Decision; do not create a website.
- READ: current authorities, this report, PDF tasks 004, 005 and 019, root callers and routes.
- CURRENT OWNER: Sol / Product Architecture; current authority remains App-only.
- ALLOWED: read-only before approval; later decision record and caller inventory through a fresh Luna card.
- FORBIDDEN: Web product creation, old Web restore, second API, Permission or Evidence truth, compatibility deletion.
- PRESERVE: protected local App work, unknown callers, original PDF and pre-beta account decision.
- TESTS: authority consistency, duplicate-owner scan, caller classification and no-source-write check.
- EVIDENCE: approved decision, caller matrix and fresh ROUND 02 Charter.
- STOP: no Product Owner approval, unknown owner or protected overlap.

I

WEBSITE / WEB WORKSPACE CURRENT STATE

Surface	Status	Source evidence
Public Website	ABSENT	no SEO site, cases, trial, purchase, help or deployment
Web Workspace	ABSENT	root redirects; API blueprint has no user workspace
Flutter Web	ABSENT	no app/web and metadata has no web platform
Flask templates and static	ABSENT as product	folders absent; routes mostly JSON or redirect
experience_v2	HISTORICAL	242 files removed; must not restore
Tracked HTML and JS	NOT A SURFACE	HTML is docs; JS is acquisition or Playwright
Web deployment	ABSENT or STALE	Docker is Core only; port 8200 docs conflict with 8201
Browser login	ABSENT	Core auth route is not a Workspace login
Shared Core	PARTIAL	54 bindings remain acceptance pending

J

APP ONLY COMMERCIALIZATION CONSTRAINTS

- No indexable and shareable commercial website or conversion path.
- Ordinary review, approval and report reading require desktop installation.
- Light collaboration is coupled to privileged CDP, Cookie, Collector and Local AI concerns.
- Only six App screens are implemented and no current live or CI evidence exists.
- Mobile should be Companion, not a duplicate full production client.
- Old tunnel and port 8200 assets conflict with the current port 8201 launcher.

K

MULTI-SURFACE TECHNICAL OPTIONS

Option	Reuse	SEO and fit	Main risk	Second truth risk	Decision
Flutter Web for all	High	Workspace good; Public poor	browser lacks local capability	Medium	not for all Web
Independent Workspace	Low	browser native	duplicate semantics and adapters	High	do not start
Hybrid	High for Workspace	Public SEO plus app workspace	capability and deploy contract needed	Medium	RECOMMENDED, NOT APPROVED
Split deployment	High	clear commercial entry	identity, version and SSO operations	Medium	Hybrid form

L

PUBLIC WEBSITE vs WEB WORKSPACE BOUNDARY

Dimension	Public Website	Web Workspace
Purpose	explain, trust and convert	production work and collaboration
Content	product, use cases, cases, demo, trial, purchase and help	Subject, BrandFocus, task, result, Evidence, action and report
Truth	no production business truth	canonical API and ViewModel to Product Core
Permission	public plus trial and login handoff	account, tenant, domain and subject Permission
Evidence	sanitized demo only	real lineage, trace and return
Deployment	SEO HTML, SSR or static	application deployment compatible with Core
Forbidden	workflow copy or fake status	unsafe Cookie or CDP clone and simulated success

M

PDF MULTI-SURFACE DELTA

Original task	Preserve	Add or split	Acceptance
Backend, DB, Evidence, Permission	all	do not rebuild Product Core	multiple callers, same owner
Runtime, Collector, Browser, AI	all	Desktop-only capability state	Web cannot simulate local work
44 specifications	business meaning	surface outcomes	Sol defines surface
44 sketches	historical input	Web, Desktop, Mobile and Public concepts	different layouts allowed
44 acceptance	all, currently blocked	per-surface closure	real data and runtime
Release and E2E	all	Public to Web to Desktop to Mobile	ROUND 15 evidence
Task IDs	000-224	delta absorbed into existing rounds	no ROUND 16

N

RECOMMENDED PRODUCT-SURFACE DECISION

RECOMMENDED / NOT APPROVED

Hybrid: SEO-native Public Website; Flutter Web Workspace as the preferred reuse candidate over existing App contracts; Flutter Desktop as the advanced local execution client; Mobile as Companion. Public and Workspace deploy separately but share one identity handoff, version contract and Product Core.

Reason: Flutter and the 44 screen contracts are the only current Experience assets, so an independent Workspace raises second-truth risk. Public marketing and help content needs a document and SEO model that Flutter is not designed to own.

Order: ROUND 02 decision; ROUND 03-07 Core convergence; ROUND 08 surface foundations; ROUND 09-14 workflow matrices; ROUND 15 cross-surface release.

o

PRODUCT OWNER DECISIONS REQUIRED

- Approve or reject changing APP ONLY to ONE Product and MULTIPLE EXPERIENCE SURFACES.
- Approve or reject Hybrid: SEO Public Website, Flutter Web Workspace, Desktop Power Client and Mobile Companion.
- Approve or reject Web Workspace as commercial primary entry and the Desktop-only local capability boundary.
- Approve workflow contracts with per-surface layouts instead of identical screens.
- Set account, tenant and SSO timing: internal beta no account wall; external trial requires an approved identity route.
- Assign owners and release gates for cases, Demo, trial, procurement, privacy and commercial claims.
- Approve this proposal as a delta while preserving the original PDF.

Until approved: no Web creation, no historical restore, no architecture authority edit and no APPROVED claim.

APPENDIX 1

235-PAGE FULL COVERAGE MAP

Page	Task and title	Orig	Canonical owner	Round	Status	Delta and gate
1	EXEC-01	SOL	Sol / protocol	R01	VERIFIED	Protocol retained; surface gate added
2	EXEC-02	SOL	Sol / protocol	R01	VERIFIED	Protocol retained; surface gate added

story / demo / conversion	primary operation / Evidence	local execution / CDP / file / AI	notify / approve / read

CAPABILITY BOUNDARY

- ONE Core/API
- ONE Permission
- ONE Evidence
- Desktop local only
- No fake success

APPENDIX 4

ROUND 02 HOLD POINT

Product Owner must confirm or revise sections N and O. Until then: no Luna dispatch, no governance write, no Web target, no old Web restore and no local App merge.

- After approval, Sol fetches again and records fresh remote and local SHA.
- Then issue the formal Multi-Surface Decision and ROUND 02 Charter.
- Only then create one bounded Luna card for the first executable batch.
